Jeff Wagner, Mayor
City of Pasadena
1149 Ellsworth Dr.
Pasadena, TX 77506

May 2021

To Members of City Council:

It is my pleasure to present you the City of Pasadena's Capital Improvement Plan for Fiscal Years 2021-2025. The CIP has been developed in order to further our commitment to the citizens of Pasadena by working to meet today's needs, as well as those of the future by ensuring sustainable infrastructure. The CIP identifies short- and long-term capital improvement needs, schedules capital outlays over a five-year time frame, and identifies estimated costs and funding sources for each recommended capital project.

We continue to add to a growing list of completed projects and continue to follow through with the plans and proposals made in prior years. In doing so, the City is establishing a track record of accomplishment that improves quality of life and enhances the City's image in a lasting, tangible way.

The CIP includes \$423.1 million for the five-year period from various funding mechanisms, which represents a tremendous increase in the level of investment over prior years. Streets and traffic (\$94.9 million), drainage (\$211.4 million), water (\$30.3 million) and wastewater (\$30.2 million) have a combined total of \$366.9 million and represent 86.7% of the total CIP. The remainder of the funds are reserved for Police, Fire, Park and other municipal facilities. Accordingly, the CIP reflects the priorities of Pasadena residents and taxpayers.

Most importantly, the CIP is being implemented in a fiscally responsible manner. The program is being carried out using the City's current property tax rate of \$0.533677/\$100 value, and taking into account economic conditions derived from COVID-19.

Through long range planning, we are looking to provide the resources necessary to support the growth of the City, provide services at the level that the community desires, and position ourselves to partner with other agencies to support our capital improvement initiatives. I look forward to continue working with you in this regard.

Respectfully Submitted,

A handwritten signature in black ink that reads 'Jeff Wagner'. The signature is stylized and includes a period at the end.

Jeff Wagner

OVERVIEW

CIP OVERVIEW

Pasadena, like all other cities, is facing the challenging task of providing an increasing number of services with limited financial resources. A priority of the City is the planning and improvement of public facilities. The construction of streets, water and sewer lines, recreation facilities and public safety facilities must keep pace with the changing population.

Without adequate planning, public improvements may not be given the appropriate priorities, be properly located, or realized due to lack of available financial resources. In addition, financial inefficiency and reduced public service will result. To avoid such consequences and to achieve the greatest possible economy and efficiency is the goal of the Capital Improvement Plan (CIP).

The Capital Improvement Plan is vital to our City. A capital improvement is a major, non-routine expenditure for new construction, improvements to existing buildings, facilities, land, streets, storm sewers, and expansion of the City's park system, to name a few. A capital improvement project has a relatively high monetary value, a long life expectancy, and results in the creation of an asset or extends the life of existing assets. The cost of the capital improvement includes design, legal fees, land, operating equipment, furniture, construction, etc. that is necessary to put the asset into service.

A long-term capital improvement program has many obvious benefits derived from its organized approach to planning projects. The program allows projects to be prioritized based on need, in a way that benefits neighborhoods, businesses, and residents in Pasadena. The CIP can be an effective tool for achieving goals set forth in the City's Comprehensive Plan, as well as the City's various master plans.

THE PLAN: A WORK IN PROGRESS

The development of a capital improvement program is a continual process and, consequently, should be viewed as a working document. Therefore, while the document covers a five-year planning perspective, it is revised every year in order to accommodate new projects, reflect changes in ongoing projects, and extend the program an additional year.

Projects included in the five-year CIP are either City-managed projects or include just the City's share of projects that will be managed by other agencies. If an outside agency contributes funding directly to the City for a project that the City will manage, then that cost, and funding are included in the project budgets.

The Five-Year Capital Improvement Program includes all capital projects, which are to be financed in whole or in part from funds subject to control or appropriation by the City. Therefore, the CIP includes bond appropriations (general obligation, certificates of obligation and revenue bonds), General Revenue – Cash, Economic Development Corporation Sales Tax, System Revenues – Cash and any Federal, State or private foundation grant funds received by the City for capital improvement projects.

The City strives to complete all projects within schedule and cost constraints. The CIP uses up-to-date estimates of project costs and scheduling. The most current data is reflected in the various projects included in the plan.

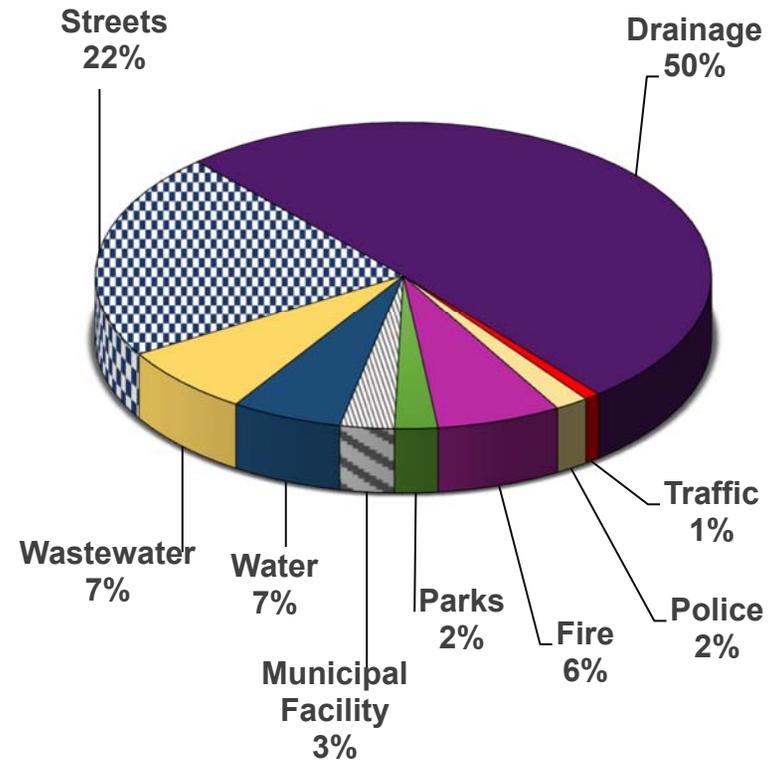

Funding for CIP projects are derived from various sources, including: General Obligation Bonds, Certificates of Obligation, Water & Sewer Revenue Bonds, General Revenues, System Revenues, Pasadena EDC, County Contributions, Federal and State Highway Funds, and Grant Funds.

The Capital Improvement Plan (CIP) uses of funding include the following categories:

- Streets
- Drainage
- Traffic
- Police
- Fire
- Parks
- Municipal Facility
- Water
- Wastewater

Drainage within street projects is not separated on the project detail. An estimated 25% of all street projects can be attributed to drainage.

2021 - 2025 CIP Totals By Program - \$423.1 Million

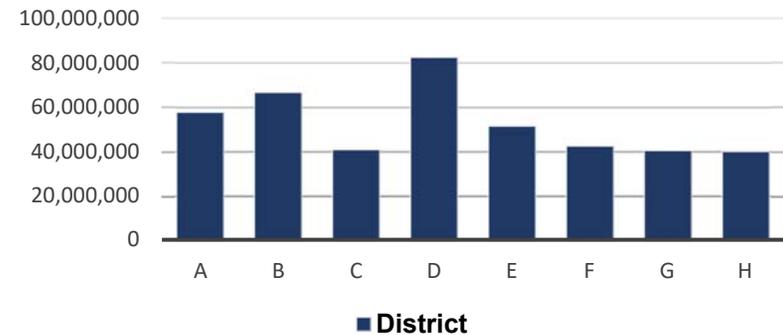

2021-2025 CAPITAL IMPROVEMENT PLAN

The five-year CIP for 2021-2025 is \$423.1 million. Over the next five years, \$362.5 million is allocated for tax-supported programs (streets, drainage, police, fire, parks, library and municipal facilities). Planned water and wastewater projects total \$60.6 million. Street, traffic and drainage projects total \$306 million for the FY 2021-2025 period, over 84.5% of the total tax supported program.

The CIP makes full use of existing funds, including balances remaining from previous bond sales (\$22 million) and from a variety of “pay as you go” sources, including the Pasadena EDC (\$30.9 million). The Plan further proposes to maximize the use of these local dollars by partnering with the State, Harris County and Federal Grants.

The CIP serves as a “control” document for the projects still underway from prior years that have not been completed. This means that actions taken to design, construct, and appropriate funds for projects will be consistent with the CIP as adopted by Mayor and Council. As individual ordinances come to City Council to implement projects, the ordinance will include any specific changes to the CIP required to accommodate the specific project related action proposed.

2021 - 2025 CIP Totals By District - \$423.1 M

PLANNING EFFORTS

The CIP is largely based on prior plans that require major long-term improvement in the City’s streets, drainage, sewers, waterlines and facilities. Major, lasting improvements that require years to plan, design, finance and complete provide the focus for capital planning effort.

Proposed projects serve every sector of the city, with slightly more allocated for projects in areas of greatest need caused by deterioration, flooding and age.

The capital planning process began when operating departments developed proposed project lists based on work orders generated from citizen complaints, and feedback from maintenance divisions responding to these work orders.

CIP IMPACT

The CIP for the City of Pasadena is focused on adding value and extended life to City infrastructure with minimal increase in current operating costs. Funds are expended for reconstruction work on major streets and the resurfacing of roads with no anticipated operating costs. The replacement of water and wastewater mains and lines will also help reduce costs to the operating budget. A positive impact to future operating costs is realized upon the completion of street, water, and wastewater improvements due to the upgrade or replacement of aged and sometimes malfunctioning infrastructure with newer more functional infrastructure. In fact, the upgrade and replacement of aging infrastructure lowers maintenance costs. Even so, windfall savings are not expected as infrastructure yet to be repaired or replaced continues to age, creating a balance between new maintenance requirements and new infrastructure requiring little or no maintenance.

A total of \$100.5 million unfunded tax supported projects are identified in the City of Pasadena's CIP. These unfunded projects, as well as others, are prioritized by needs and compared against future debt levels and revenue projections to determine the timing of debt issuance and construction. Again, CIP projects financed through property tax supported debt indirectly impact the operating budget through the payment of principal and interest on the incurred debt. Funding sources other than debt are utilized when possible to minimize debt-related operating impact.

FINANCING THE CIP

The FY 2021-2025 Capital Improvement Plan calls for the allocation of \$423.1 million. Funding for CIP projects are derived from various sources, including General Obligation Bonds, Certificates of Obligation, Water & Sewer Revenue Bonds, General Revenues, System Revenues, Pasadena EDC, County Contributions, Federal and State Funds, and Grant Funds.

General Fund

The General Fund represents \$15.2 million or 9.6% of the FY 2021 capital budget. Over the next 5 years, it is expected the General Fund will finance \$35 million of the CIP.

Long Term Debt

The City issued \$37 million (2017) and \$36 million (2018) in Combination Tax and Revenue Certificates of Obligation.

General Obligation Bonds and Certificates of Obligations are \$17.3 million or 10.9% of the total funding for FY 2021. General Obligation Bonds will fund \$22.2 million of projects over the next 5 years.

Intergovernmental Funds

Intergovernmental funds consist of federal grants, Harris County, State Grants and TxDOT contributions. These funds represent \$85.9 million or 54.2% for FY 2021. The majority of these funds are for the reconstruction of residential streets. Intergovernmental Revenues will fund \$158.9 million of projects over the next 5 years.

The majority of these funds (\$114.7M) consists of a FEMA Hazard Mitigation Grant (HMGP) for which the City applied after Hurricane Harvey. The grant totals \$152.9 million. Expenditures prior to FY 2021 for the design phase total \$13.2 million. This is a 25% matching grant of \$38.2 million. With the passing of Senate Bill 7 (SB7), the City expects to receive an additional grant of \$28.7 million from the Texas Division of Emergency Management (TDEM). The General fund will fund the remaining \$9.5 million.

Other City or Local Funds

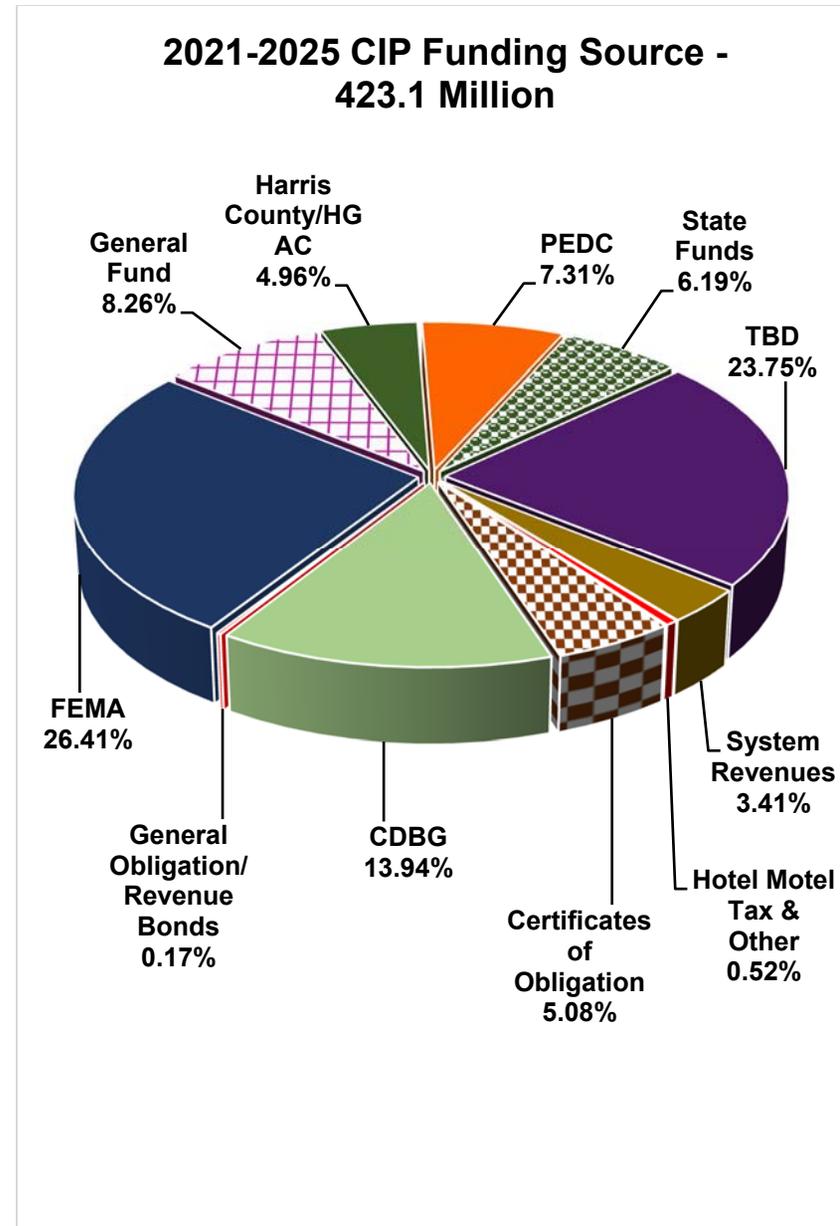

Other City or Local Funds represent \$36.3 million or 22.9% of the FY 2021 capital budget. Other City or Local Funds will fund \$92.1 million of projects over the next 5 years. The majority of these funds are from Pasadena Economic Development Corporation (PEDC), Community Development Block Grant (CDBG) and Hotel/Motel Tax.

Revenue Supported Programs

For FY 2021, Water and Sewer System Fund represent \$2.4 million or 1.5% of the capital budget. These projects consist of water and wastewater improvements.

Other Funding

Projects listed in the CIP having “to be determined” funding totals \$100.5 million.

CITY OF PASADENA DRAINAGE AND FLOOD MITIGATION PROGRAM

The City of Pasadena Drainage and Flood Mitigation Program (Drainage Program) has been established as a benchmark for protection of the National Flood Insurance Program (NFIP) and the lives of all citizens affected by flooding events. The Program focuses on Low to Moderate Income areas outside the 100 Year floodplain that generally hold lower Benefit Cost Ratios and need advocate support to promote critical restoration.

The Drainage and Flood Mitigation Program identifies 8,600 acres of low to moderate income areas that experienced flash flooding for area susceptibility and maximum impact for mitigation. The areas are 85% outside the established floodplains and pose the greatest exposure of liability to the NFIP providing flood insurance policies below \$500/annually. The potential for new policy issuance is highest in these areas due to high media publicity. The potential cost to the NFIP of minimal \$10,000.00 damage claims sets into motion a twenty-fold cost ratio that is untenable and unacceptable to us all.

The Drainage Program mitigation areas were originally developed prior to Flood Insurance Rate Maps (FIRM) during a period of development that placed homes at street level utilizing sheet flow collection without internal roadway collection systems. A secondary regional impact is subsidence due to groundwater use for potable supply. The Harris Galveston Subsidence District indicates that prior to transfer to surface water treatment for potable purposes during the 20th century, the Pasadena region experienced 6-9' of subsidence creating the identification of a 500 Year floodplain.

In conjunction with enforcement of minimum slab elevations for new construction, we interpose the regional concept of lowering right-of-way elevations by installing internal collection storm sewers and lowering roadway elevations 1-2 feet effectively creating critical

storage that impacts all properties along corridors to reduce water surface elevations below current slab elevations. This concept follows current design methods for new subdivisions where streets flood without impact to homes and commercial properties.

The target areas will introduce storm sewers and lower roads without increasing outfall pipe sizes. This will mitigate downstream impacts and reduce the need for interagency approvals by Harris County Flood Control District (HCFCD) and the US Army Corps of Engineers (USACE) creating the ability to expedite the construction schedule. Major Channel projects are ineffective and futile due to flood elevations from White Oak, Buffalo, Brays and Sims Bayous feeding into the Houston Ship Channel and controlling Base Flood elevations in Pasadena.

The target development of the Drainage Program is to eliminate flooding around 6,000 properties without placing onerous costs on low to moderate income neighborhoods. The projects are indiscriminate to the lives and property of citizens while providing additional confidence to the NFIP for issuance of expanding coverage caused by large scale media broadcasting of Hurricane Harvey.

DRAINAGE MITIGATION GRANT

Design and engineering was completed as part of the City's Phase I Award from FEMA/TDEM and we are now in the process of receiving Phase II (construction) approval for a total grant of \$152.9 million. The City's match will be reduced from 25% to 6.25% due to the passing of Senate Bill 7 (SB7) by the Texas Legislature. With this grant, the City will replace approximately 26 miles of roadways and create detention on City owned property. The following roads are included in this project:

Street	Limits	Street	Limits
Alice Avenue	Scott St to Park Ln	Fern Street	Deepwater Ave to Sherman Ave
Alvin Street	Thomas Ave to Harris Ave	Fresa Road	Strawberry Rd to Cherry Ln
Azalea Court	Mobile Dr to Mobile Dr	Garret Street	Taylor Ave to Thomas Ave

Yaupon Avenue	Sunset Dr to Richey St

PROGRAM HIGHLIGHTS

Street and Drainage Programs

The CIP includes \$302.6 million for streets and drainage for the FY 2021-2025 period. Sales tax revenue in the amount of \$16.5 million from the Pasadena Economic Development Corporation is allocated for the FY 2021-2025 street and drainage program. Other major funding sources include the General Fund, Certificates of Obligation, a mixture of grant funding (CDBG, CDBG-DR, HMGP), and Harris County.

Improvements to major thoroughfares, collector and residential streets played a key part in the development of this capital improvement program. After major flood events such as the Tax Day Floods, Memorial Day Floods and Hurricane Harvey, a major emphasis was placed in pursuing funding for improvements to the City’s drainage system. The FEMA Flood Mitigation Grant is \$152.9 million, or 51% of the total streets and drainage program.

Traffic Program

The traffic program includes \$3.4 million allocated to projects from the General Fund and PEDC scheduled in the next five years. The projects include the continuation of the upgrade of the city’s traffic signal system, as well as installation of much-needed new signals at intersections around the City.

Traffic projects funded in the FY 2021-2025 traffic program concentrate on replacing equipment and installing wireless spread spectrum radio communications.

Although not reflected in the traffic program, bear in mind that each major street project (Richey St., Pasadena Blvd., etc.) includes upgrades to various traffic signals and intersections. Consequently,

these are improvements to the city’s traffic signalization and intersections.

Police Facilities

The police program consists of \$7.3 million for FY 2021-2025. The completion of the new Police Academy was a major accomplishment for FY 21.

Included in this capital improvement plan is the renovation of Old City Hall (1211 Southmore Ave) to serve as a Police Annex Building which will give the PD much-needed space to house a property and evidence warehouse.

Fire Facilities

The fire program includes \$27.3 million scheduled for the next five years. The Fire facilities program includes the replacement of stations #6 and #7, as well as a new Fire Administration Facility. Funding is to be determined at this time.

One of the highlights of this year’s CIP efforts is the opening of Fire Station #8 and the Fire Academy, which means that five new fire stations have been constructed since the CIP process began.

Park Improvements

The \$9.4 million parks program, like the street program, is an example of leveraged funds. Six different sources provide funds for this program with \$1.285 million in the CIP coming from proceeds from the sale of property on Preston Street.

The parks CIP includes a balanced effort to improve the City’s parks system overall, including new facilities and the expansion of the City’s trail system.

Water System Improvements

The water program for FY 2021-2025 includes \$30.3 million to continue improving the city’s distribution and storage system.

Anticipated improvements to the City’s water system include constructing new water lines to replace existing lines and providing additional loops in the distribution system to equalize pressure and to transmit water from the Southeast Water Purification Plant (SEWPP) northward into the city. Water wells and water storage facilities will be both rehabilitated and increased in capacity to provide additional system reliability.

Wastewater System Improvements

The \$30.2 million wastewater system program for FY 2021-2025 continues the replacement of sanitary sewer lines and lift stations. It also includes improvements needed in order to continue efforts to complete the diversion of flow from the Golden Acres Wastewater Treatment Plant into the Vince Bayou Wastewater Treatment Plant. Elimination of the Golden Acres WWTP will help reduce increasing operating costs due to the age of the plant.

CAPITAL IMPROVEMENT PLAN PROJECT DETAIL

Project ID: S047	Program: Streets
Project Name: Wafer St Paving & Drainage Phase II	Category: Residential Streets
Description: Reconstruction of Wafer Street from Harris Ave to Southmore Ave. Remove existing street and install new concrete paving, curb and gutter sections with suitable size storm water inlets at appropriate locations to drain the street.	Justification: This street was rated in poor condition and improvements will enhance quality of life for the neighborhood and will also help alleviate area flooding.

CAPITAL IMPROVEMENT PLAN PROJECT DETAIL

Project ID: DMA3	Program: Drainage
Project Name: Drainage Mitigation Area A-3	Category: System Improvements
Description: Improvements consist of drainage, utility adjustments, and paving replacement with sidewalks, driveways and ADA curb ramps. See Table DM-1 for list of streets and limits included in this CIP.	Justification: The project alleviates flash flood conditions in and around area properties along and adjacent to the drainage area.

CAPITAL IMPROVEMENT PLAN PROJECT DETAIL

Project ID: DMC4	Program: Drainage
Project Name: Drainage Mitigation Area C-4	Category: System Improvements
Description: Improvements consist of drainage, utility adjustments, and paving replacement with sidewalks, driveways and ADA curb ramps. See Table DM-1 for list of streets and limits included in this CIP.	Justification: The project alleviates flash flood conditions in and around area properties along and adjacent to the drainage area.

CAPITAL IMPROVEMENT PLAN PROJECT DETAIL

Project ID: W027	Program: Water
Project Name: Bay Area Blvd and Port Rd Waterline Relo	Category: Water Sys Imprvmts
Description: Interlocal Agreement with HC to relocate the City's existing 12" waterline at the intersection of Bay Area Blvd and Port Rd.	Justification: Harris County intends to construct intersection improvements including widening the west bound bridge at Bay Area Blvd for the addition of a left turn lane, which will make it necessary for the City's line to be relocated.

CAPITAL IMPROVEMENT PLAN PROJECT DETAIL

Project ID: WW063	Program: Wastewater
Project Name: Bay Area Ind Pk WW LS & FM	Category: Wastewater Imprvmts
Description: Construction of a lift station & forcemain for Nestle Water to pump treated wastewater to a Gulf Coast Authority collection point and ultimately the wastewater treatment plant.	Justification: Nestle Water's production is limited due to the private lift station serving the industrial park area. The construction of a new lift station will give Nestle the ability to pump additional wastewater and they could therefore buy additional water from the City.
